Leroy:

I assume the resumes are for operator rates. I do not plan on paying these rates until we begin the excavator activities and only for the excavator activities.

Thanks

Gary:

I had Brian come in this week to discuss staffing issues with SWSES. They are currently hiring additional cleanup technicians. Gary Jone's father has stabilized. Hopefully we will have him back this week. There was a misunderstanding with the a portion of the crew during the Lonestar operation. They waited too long to off load water from the vacuum truck into FT 1001. We had a good discussion the next morning about this and the importance of staying on task and asking question when you get hung up.

I asked Brian for three things. His ideas on the lime tank, he has done quite a few of these, resumes for Mike Turner and Rodney Johnson, and the need to keep Miguel. Mike and Rodney both have a wealth of experience and are a great addition to our crew.

Chuck provided me a lot of support this week and was instrumental in getting our operational and health and safety plan approval for our material transfers through CB&I Federal Services Health and Safety.

Leroy:

I am disappointed in the amount of work accomplished by the SWS crew this week. I will talk to Mark

9855188

to see what he thought of the work accomplished by the crew. He did mention that he noticed the crew just standing around when Lonestar was on-site and that he talked to you about this. The crew needs a foreman that is going to push them. I don't think Chuck will push them to get the work done.

Subject: Friday End of Day Summary

Gary:

It was another long day at CES Environmental. The crew completed group 22 and started on group 23. This material was very thick. They completed four drums today. The crew secured the CES office door, block the door with braces, and screwed the door to the door frame. We received the rejected FT 1004 load from Lonestar and place it into two Vacuum Boxes. According to Daniel, they did fill one and then moved over to the other box. We empty the vacuum truck into FT 1001 and examined the truck. It did not require a clean out. The crew cleaned out the North Pond Sump and continued to pump water from the South Pond to the Middle Pond and the Middle Pond to the storm sewer. The Adler Vacuum Boxes are off rent. They are picking them up on Monday, taking them to TIBM and back to their yard. Dynamic is picking up three vacuum boxes also on Monday and doing the same thing. I am looking forward to the weekend, heading out for my walk now.
